

DEEP RANJAN

Noida, India | ranjan14deep@gmail.com | +91-7580077564 | linkedin.com/in/deep-ranjan

Technical Skills

Languages: C#, C++, SQL, Data Structures

Game Development: Unity Game Engine, Gameplay Architecture, Multiplayer, OOPS, SOLID, Zenject, Addressables, IAP, IAA (In -App Advertisement)

Backend & SDKs: ASP.NET Core, REST APIs, Firebase, AWS S3, IronSource

Platforms: Android, iOS, WebGL

Tools: Git, GitLab, Source Tree, Jira, XCode, Android Studio, Claude, Cursor

Professional Experience

Octro Inc.

Game Developer – Sep 2022 – Present, Chandigarh / Noida, India

Word Climber

2025 – Present, Noida, India

- Implemented In-App Purchase (IAP) flows and ad mediation (rewarded and interstitial ads) for monetization.
- Integrated Facebook SDK for login and social features, and built the "Invite Friends" UI and referral flow to drive player acquisition.
- Implemented server-side integration for player data sync, rewards, and progression.

Slot Games

Jan 2024 – 2025, Chandigarh, India

- Developed and maintained client-side gameplay systems for live mobile slot games, including paylines, wild symbols, scatter symbols, jackpots, progressive jackpots, free spins, hold-and-spin, and sticky wild features.
- Architected scalable, reusable Unity game systems using C#, OOPs, and Zenject dependency injection, implementing RTP and probability-driven gameplay for balanced, fair player experiences aligned with design and compliance requirements.
- Built LiveOps features including inbox rewards, promotional campaigns, deep linking, server-driven widgets, and event-based content delivery, and integrated analytics and A/B testing to track engagement, retention, and monetization funnels.
- Optimized memory usage, asset loading, and runtime performance across Android, iOS, and WebGL using Addressables and profiling best practices, while partnering with cross-functional teams to deliver production-ready features and troubleshoot live issues.

Blackjack

Dec 2022 – Jul 2023, Chandigarh, India

- Developed gameplay systems and multiplayer-ready architecture with robust game state management and synchronization.
- Integrated server communication systems and XML-based content management for scalable game configuration.

Poker3D

Sep 2022 – Nov 2022, Chandigarh, India

- Implemented real-time chat and emoji systems for player interaction in a multiplayer poker environment.
- Integrated third-party SDKs including Facebook SDK, Firebase Crashlytics, Flurry Analytics, AWS S3, and IronSource with analytics tracking.

Education

National Institute of Technology (NIT), Hamirpur

2022, Hamirpur, India

Dual Degree (B.Tech + M.Tech), Electronics and Communication Engineering

Key Achievements

- Improved runtime performance and reduced crash rate by ~20% through memory optimization, asset loading improvements, and profiling-driven fixes across Android, iOS, and WebGL.
- Built reusable, modular gameplay architecture using Zenject dependency injection, improving development scalability and reducing new-feature development time by ~20%.
- Successfully integrated multiple third-party SDKs (Facebook, Firebase, AWS S3, Flurry, IronSource) for analytics, monetization, and stability.
